Informatics student (graduating 2027) and former Front-End Developer Intern at PT PLN Icon Plus, where I built Vue 3 and TypeScript interfaces for an internal LNG supply monitoring platform. Background in UI/UX and business analysis (BPMN, information architecture), now growing toward full-stack development.

Experience

PT PLN ICON PLUS - **Jakarta Selatan** Mar 2026 - Jul 2026

Front-End Developer Intern

- Built the Vue 3 + TypeScript front-end of an internal LNG supply monitoring platform, integrating with REST APIs owned by the back-end team.
- Developed a config-driven generic data view reused across modules: server-side pagination, search and two-stage filtering, CRUD modals, PDF/XLSX export, and role-based action visibility.
- Implemented contract and transaction workflows (approval/rejection, draft saving, document upload) backed by shared composables for validation, formatting, and drafts.
- Built an interactive Leaflet map dashboard showing vessel routes and delivery realisation, loading data from multiple endpoints in parallel.
- Produced BPMN process models, information architecture, ERDs for five core modules, and the Figma design system and hi-fi prototypes used for implementation.

Projects

ByBrandy Website (Admin Panel) - **Laravel, MySQL, Bootstrap** 2024

- Built the admin dashboard for a fashion rental client's website (8-person course project): product CRUD with image upload, order status and payment management with stock adjustment, and user role management.

Moodlens - **Kotlin, Jetpack Compose** 2025

- Built the Mood Journal module UI in Jetpack Compose, including a reusable Card component used across its screens.

Beautiful of Java - **React.js** 2024

- Designed the user flow and built the dashboard, interactive map, destination detail, and About pages of a regional tourism platform in a 4-person team; proposed shared components (buttons, cards) for UI consistency.

Education

Universitas Multimedia Nusantara - **Kabupaten Tangerang, Indonesia** Aug 2023 - Jun 2027 (Expected)

Bachelor of Informatics, 3.55/4.00

Relevant Coursework: Database Systems, Software Engineering, Web Programming, Object-Oriented Programming

Certifications: Huawei Certified in Database, Huawei Certified in AI (Huawei ICT Academy), EF SET English Certificate (C2)

Skills

- **Languages**: JavaScript, TypeScript, PHP, Kotlin, HTML, CSS
- **Front-End**: Vue 3, React.js, Tailwind CSS, Bootstrap, Jetpack Compose
- **Back-End & Database**: Laravel, RESTful API integration, SQL (MySQL)
- **Tools & Methods**: Git/GitHub, Figma (UI/UX, design systems), BPMN, Information Architecture, ERD

Achievements

- **Top 5 Finalist**, IsFest UI/UX Competition 2025 (Information Systems Dept.): designed “ReHub”, an accessible rehabilitation web prototype based on Shneiderman’s 8 Golden Rules.
- **2nd Place**, Career Case Competition 2025 (Career Development Center): developed and pitched an analytical framework for an organizational business case.

Organisational Experience

Dewa United Basketball (IBL) - **Banten, Indonesia** Jul 2025 - Aug 2025

Freelance Floor Director

- Coordinated 20+ participants and 4+ timed live segments per match as liaison between the control room and on-court production team.

Tangerang Hawks Basketball (IBL) - **Banten, Indonesia** Jan 2025 - Aug 2025

Freelance Logistics Coordinator / Liaison Officer

- Led a 4-member team handling game-day logistics, inventory, and equipment readiness.
